

Crazy letters

Rules:

Each participant takes 10 tiles.

Put the tiles in front of you – visible for everybody.

The youngest participant is allowed to start.

Try to make a word with your 10 tiles.

Put together as many letters as you can.

Try to make one word in each round. All words are allowed.

Each letter has value of „1 point“.

The tiles with the smiley faces have the value of „0 points“.

They are the jokers and can be any letter.

If the letter covers a special field, you get more points:

yellow field = double value of the word

blue field = three times the value of the word

red field = four times the value of the word

black field = five times the value of the word

When you have finished laying your words, take again the number of tiles that are missing – so that you have 10 again.

Write down your points on a score sheet.

Now your neighbour on the left is the next player.

The game is over when nobody can create another word.

The winner is the player with the most points.

Have a lot of fun :).
